## **New Niche Cabinet Showroom In Fairfield: *Featuring Affordable & Modern Assembly Cabinets***

FAIRFIELD, OH – Cooknee, a Cincinnati-area cabinet dealer and design service for builders and designers, announces the opening of its private showroom in Fairfield that will be available for public review. Cooknee fills a niche in the kitchen/bath market by providing Cincinnati area customers with the top in-style options in cabinets and accessories, but at an affordable price with step-by-step design assistance and detailed service.

Cooknee will be Cincinnati's exclusive dealer to showcase Sammy's® Kitchen & Bath cabinets – a unique contemporary line of European-style cabinets originating from Canada and Europe that's **brand new to the Cincinnati area!**

"I'm really excited to offer these new, affordable contemporary cabinets in the Cincinnati area," states Julie Savchenko, owner. "Now people can get the modern European kitchen style with good quality and a better price."

According to Savchenko, the Sammy's cabinets come unassembled, so the pricing is very reasonable. Cooknee provides full assembly and installation services, however, special DIY (Do-It-Yourself) pricing options are available for those customers who want to just buy the cabinets and do the assembly/installation themselves.

Savchenko further adds that these cabinets can be ordered in more than 40+ colors to satisfy any design or color palette. They also feature lift-up hinge aluminum frame glass doors which is a hot feature in the "urban loft" look.

"There's something here for everybody and customers will still get excellent quality for the price, plus help with design and installation if they want it," adds Savchenko. "There are so many choices now in kitchen and bath design, that many people are overwhelmed. What I wanted to do was to break it down into simple steps and help people get the look they want without spending a fortune."

Cooknee's showroom is **open by appointment only** and also features Aya Cabinets from Canada, Amerock hardware and two lines of boutique designer tile. Cooknee began business in May of 2004 and currently works several custom builders, developers and designers in the Cincinnati area. More information is available online at [www.cooknee.com](http://www.cooknee.com).
